WORK EXPERIENCE

Full stack developer | UTECH pvt Ltd

Dec. 2025 – Feb. 2026

- Developed a CRM system with role-based access for Admin, HR, and Employee, increasing workflow efficiency by 20%.
- Designed and implemented UI/UX for login pages, dashboards and reusable React components, reducing page load time by 15%.
- Implemented role-based authentication and integrated backend APIs, contributing to database schema design and improving system connectivity by 10%.
- Resolved bugs and optimized performance, resulting in a 25% faster response time and smoother user experience.

Full stack developer | S Jain venture

Dec. 2024 – Oct. 2025

- Led full-stack development for Emilo (social media platform) and an online chair-selling e-commerce system, improving user engagement by 30%.
- Designed and developed user admin panels, video image editing modules, live video/audio calls, and chat functionality, increasing feature adoption by 25%.
- Built complete e-commerce functionality, including product management, CRUD operations, authentication, and API integration, reducing order processing errors by 15%.
- Debugged, optimized, and ensured scalability, improving system performance and responsiveness by 20% across all modules.

PROJECTS

CyberShield – Cyber Attack Detection System | React, Node.js, MongoDB, Socket.io | [Deploy Link]

- Achieved 85% threat detection accuracy with real-time attack detection across 10+ security rules (SQL Injection, XSS, DDoS, Brute Force).
- Engineered sub-100ms response time for threat alerts using Socket.io, successfully blocking 100+ simulated attacks.
- Built auto IP blocking firewall with geo-location mapping and JWT-based Role-Based Access Control (Admin, Analyst, Viewer).
- Developed admin dashboard with custom rule builder and user management for dynamic security configuration.

Emilo – Social Media Platform | React, Node.js, MongoDB | [Deploy Link]

- Designed and developed complete UI/UX for user panel, admin panel, and post feed with responsive layouts using React.js and CSS3.
- Built real-time chat and live video/audio calling modules using Socket.io and WebRTC, improving platform engagement.
- Implemented media upload pipeline for images and videos with compression and preview, achieving 95% performance improvement in load times.
- Developed JWT-based authentication, protected routes, and role-based access for admin and user panels.

Imagify – AI Image Generator | MERN, Clipdrop API, Razorpay | [Deploy Link]

- Built AI-powered image generation platform using Clipdrop API, enabling text-to-image creation with 85% user satisfaction response rate.
- Processed 100+ image generation requests with optimized API handling and personalized user dashboards.
- Integrated Razorpay payment gateway enabling secure online transactions with end-to-end payment flow.
- Designed RESTful APIs and handled full-stack deployment on Vercel and Render.

SKILLS

- Frontend:** React.js, Next.js, Redux, JavaScript (ES6+), TypeScript, HTML5, CSS3, Bootstrap, Three.js
- Backend:** Node.js, Express.js, Socket.io
- Database:** MongoDB, MySQL.
- Cloud:** AWS
- Tools & Technologies:** Git, JWT Authentication, REST APIs, WebSockets, Clipdrop API, Razorpay, Vercel, Render

EDUCATION

Chhattisgarh Swami Vivekanand Technical University

2021 – 2025

Computer Science and Engineering

Adarsh Higher Secondary School

2018 – 2020

Intermediate

CERTIFICATIONS

AWS Cloud Practitioner | Amazon Web Services (AWS)

2024

- Gained foundational knowledge of AWS cloud services including EC2, S3, IAM, and VPC
- Understood cloud architecture, deployment, security best practices, and cost optimization strategies
